

BLAST

For Use In Steam Cleaners and Pressure Washers

Heavy Duty Caustic Cleaner

PRODUCT DESCRIPTION:

BLAST is a concentrated, liquid, heavy duty, odorless, synthetic cleaning detergent specifically designed for use in high pressure and steam cleaning equipment. The specially formulated wetting and penetrating agents contained in **BLAST** make it highly effective against all types of grease and soil, non-abrasive and promotes extremely rapid cleaning at very high use dilutions. **BLAST** contains inhibitors to prevent hard water and soap scale build up in pressure washer and steam cleaning equipment. **BLAST** can be use for cleaning off-road type equipment such as cranes, engines, drag lines, fifth wheels, loaders, fork lifts, smoke houses, meat kill rooms and other tough jobs.

DIRECTIONS FOR USE:

BLAST is a highly concentrated product that may be diluted as high as 100 to 1 depending on soil loads. For best results, add desired amount of concentrate to soap tank of steam cleaner or drop soap tube in a drum of **BLAST** and set metering valve to desired dilution rate. When detergent/water mixture flows from cleaning gun, soak down entire area to be cleaned; return to starting point and detail clean from bottom up. When cleaning is accomplished turn off soap valve and rinse from top down. In all cases, rinse thoroughly.
